darwi[®]

CERNiT[®]
PREMIUM MODELLING CLAY

www.efco.de

EN

Polymer Clay

Preparation:

- Roll a piece of Cernit by hand and knead gently till it is supple and shapeable. Always work with clean hands on a clean surface.
- All colours can be mixed with each other, lightened with white opaque, blended with Glamour for pearly or nacre effect.

Structure and decoration:

- Cernit can be easily worked on with different tools: knife, toothpick, squeezing machine, scissors and all CERNIT-Accessories. The clay can be shaped, moulded, embossed or combined with other materials: glass, stones, beads, ...

Baking:

- Pre-heat electric oven at 110°C to 130°C / 230°F to 266°F. The baking time is maximum 30 minutes. Do not use a microwave oven.
- After baking the realisation is so firm that it can be drilled, filed or sanded.
- Use acrylic paints, watercolours, decorative powders or varnishes to enhance your realisation.
- Let your creativity run wild!

Safety rules:

- Suitable for ages 8 and above with adult supervision.
- Safety rules in accordance with EU standard EN 71/1/3/5/9.
- Modelling clay should not be put in the mouth.
- Do not exceed maximum 130°C / 266°F baking temperature as harmful gases could develop.
- Do not exceed a baking time of 30 minutes.
- Clean all equipment after use and assure hands are washed.
- Do not eat, drink or smoke in the activity area.

Cernit Shiny

79 58. .. Cernit Shiny, 63 x 55 x 15 mm, SQ: 6 pc 56 g

Cernit Shiny is produced on the basis of very fine coloured mica. The Mica particles only become visible after baking due to the slight transparency of the clay. This series was specially developed for the mica-shift technique. Cernit Shiny gives every realization a very noble mother-of-pearl effect, it shimmers without any single glitter particles being visible.

Cernit Natural

79 53. .. Cernit Natural, 63 x 55 x 15 mm, SQ: 6 pc 56 g

Cernit Soft Mix

79 560 05 Cernit Soft Mix, 63 x 55 x 15 mm, SQ: 6 pc 56 g

Content: 56 g Softener

How to use:

By mixing CERNIT SOFT MIX with harder CERNIT polymer clay, it becomes softer and easier to process. The mixing ratio is max. 2/3 CERNIT polymer mass and 1/3 CERNIT SOFT MIX. The colour may change slightly.

METALLIC – Coloured mica powder in metallic colours

INTERFERENCE – Coloured effect pigments with pearlescent effect

DIAMOND – Coloured glass powder, extremely sparkling

DUO – Coloured effect pigments, colour change depending on the viewing angle and lighting conditions.

Properties:

- Coloured Mica powder
- Available in metallics or tonal accents
- Metallic or pearlescent finish after firing.
- Can be varnished with Cernit-Lack

Application:

- Apply with a brush or fingers to the unfired clay.
- Fire as normal
- Protect with Cernit-Lack if desired.

ø 1 + 0,5 mm / 133 mm

Cernit metal ball tools are used for modeling and sculpting of polymer clay. They can be used to make realistic flower petals, to dig a doll's face, eye sockets, etc. The little ones will be used to create the details.

Modeling with these tools rather than by hand has undeniable advantages: no fingerprints, unequalled regularity and precision! With slight pressures, you can give volume and relief to your project. Both skilled and amateurs will notice that these tools are a must.

It is not necessary to be very experienced to use these items, but the result you can get is completely professional!

Each tool has two tips of different sizes.

Cernit varnish

79 630 01 Finish Glass, epoxy resin + hardener, 9,5 x 13 x 5 cm, 7 parts / 120 + 60 ml SQ: 1 Set

The Kit Finish Glass Cernit is a 2 component epoxy resin based transparent varnish. The resin has a smooth and glossy finish with no bubbles. As the name shows, the resulting hardness and transparency give to your piece a glass-like aspect. Even in thick layers, the Kit Finish Glass will create well-levelled surfaces.

Components of the set are the following :

- 1 bottle of 120 ml component A (epoxy resin)
- 1 bottle of 60 ml component B (hardener)
- 1 small measuring cup
- 2 plastic gloves
- 1 small wooden stick to prepare the mixture
- 1 manual with various techniques

crystal finish

Finish Glass

79 640 01 Finish Glass, epoxy resin + hardener, 13,5 x 16,5 x 7 cm, 2 parts / 500 + 250 ml SQ: 1 Set

The Kit Finish Glass Cernit is a 2 component epoxy resin based transparent varnish. The resin has a smooth and glossy finish with no bubbles. As the name shows, the resulting hardness and transparency give to your piece a glass-like aspect.

It is possible to colour the resin with solvent-based colours such as the Darwi Glass paints. Even in thick layers, the Kit Finish Glass will create well-levelled surfaces.

79 620 03 Cernit varnish, 60 x 60 x 135 mm, 250 ml SQ: 1 pc

Cernit varnish

Characteristics:

- Waterbased varnish
- After 48 hours drying time the varnish is perfectly transparent and highly resistant

Applications:

- After baking clean the realisation thoroughly with alcohol
- Once dry, apply 2-3 coats of varnish allowing an hour between each application
- Finally when thoroughly dry, bake again in a pre-heated household oven for 15 minutes at 110°C.

Cernit Glue

   SQ: 5 pc

Cernit Magic Mix

79 410 00 Cernit Magic Mix, 80 ml

  SQ: 5 pc

Strong adhesive for raw and baked polymer clay

- must be baked (max. 130°C during max. 30 min.)
- Cernit Glue is used to glue your realizations of polymer clay (raw, baked or a mixture of both) together.
- It can also be used to bond polymeric clay with other porous or non-porous materials.
- Glues effortlessly, a light pressure is enough to glue the different parts together without damaging them

Cernit Magic Mix: the essential for all your achievements in Cernit! Use it to soften the clay which is a little firm. If you have forgotten your piece of clay at the back of the cupboard, whether they are crumbling or hard, you can recover them very easily! The Magic Mix takes care of everything. **Do not throw away any more polymer clay !**

It is a plasticizer used for the polymer clay. Mix it little by little with the clay until you get the desired consistency. Use with a paste to recover or simply to give more elasticity to your clay. Thus, it will be even more stretchable! Once cooked, your clay is unbreakable!

To create a „chewing gum“ clay effect, add more Magic Mix to the Cernit tone of your choice!

Continue adding the miracle product to get a **liquid polymer clay** of your favorite colour and coordinate your pieces with this same colour! You can achieve even more possibilities!

Use the Magic Mix to **remove fingerprints** in a flash. Gently apply the product to the surface to make it smooth.

The Magic Mix is also a perfect ally with acrylic paint: make it more flexible, perfect for the technique of pouring where the acrylic tends to crumble or crack! Mix up to 10% of Magic Mix with your paint.

Attention, this type of pure product is not intended to come into contact with plastic. It could damage this material.

This product does not contain phthalates.

Darwi ROC

79 100 10 Darwi ROC, 190 x 85 x 30 mm, 1000 g SQ: 2 pc

darwi® ROC – Self-hardening paste – Marble effect – For modelling and sculpture

Characteristics:

- Very smooth, self-hardening
- White
- Minimum drying time: 24 h/cm
- Does not shrink when it dries
- Adheres to a wide variety of materials: wood, polystyrene, ceramics, glass, plastic, ...
- Suitable for amateur and professional artists
- The fine grain of ROC is suitable for the finest modelling jobs like making fine prints
- Easy to cut with a knife or scissors
- You get a marble-like surface after sanding the dry paste
- Good shock resistance when dry

Applications:

- Shaping details, repairing frames, sculpture, ...
- When the work is finished, you can sand it (sandpaper) to get a smooth, marble-like surface...

white

Darwi Classic

79 060 10 Darwi Classic, 150 x 66 x 27 mm, 500 g SQ: 5 pc

79 070 10 Darwi Classic, 190 x 85 x 30 mm, 1000 g SQ: 4 pc

darwi® Classic/Terracotta – Self hardening modeling paste

Characteristics:

- Very homogeneous and self hardening
- Classic: white
- Terracotta: red
- Minimum drying time is 24 hours per cm
- No shrinkage due to drying
- Adheres to a wide variety materials easily, such as wood, polystyrene, ceramic, glass, plastic, ...
- Suitable for children and adults, amateur and professional artists
- The fine texture of the clay allows the work of the most delicate modeling as thin fingerprinting
- Easy to cut with a knife or scissors

Applications:

- Before modeling, slightly dampen your hands, then knead the dough well for it to soften
- Drying: at room temperature on absorbent paper
- Paint or varnish

white

Darwi Extra Light

79 290 10 Darwi Extra Light, 145 x 66 x 27 mm, 160 g SQ: 5 pc

darwi® Extra Light – Self-hardening paste – Lightweight – For modelling and moulds

Characteristics:

- White modelling paste, self-hardening
- Extremely light weight, and very flexible
- Drying time: 24 h/cm
- Does not shrink when drying
- Can be used to shape a huge variety of objects in a surprisingly lightweight material. Perfect for making unbreakable decorative magnets, doll heads, ...
- Adheres to a wide variety of materials such as wood, polystyrene, ceramics, glass, plastic, ...
- Totally suitable for moulds
- Will not stain hands or clothing

Applications:

- Dampen your hands before modelling, then knead the paste to make it easy to shape.
- Do not dunk the paste in water, or put too much water on it – it will get too sticky to shape easily and could form cracks as it dries
- To add a layer on dry paste, dampen the piece before adding fresh paste.
- For porous surfaces, dampen the surface of the support before applying the paste
- Paint or glaze

Darwi Kids

79 220 00 Darwi Kids, 150 x 66 x 27 mm, 500 g SQ: 4 pc

79 220 10 Darwi Kids, 190 x 85 x 30 mm, 1000 g SQ: 2 pc

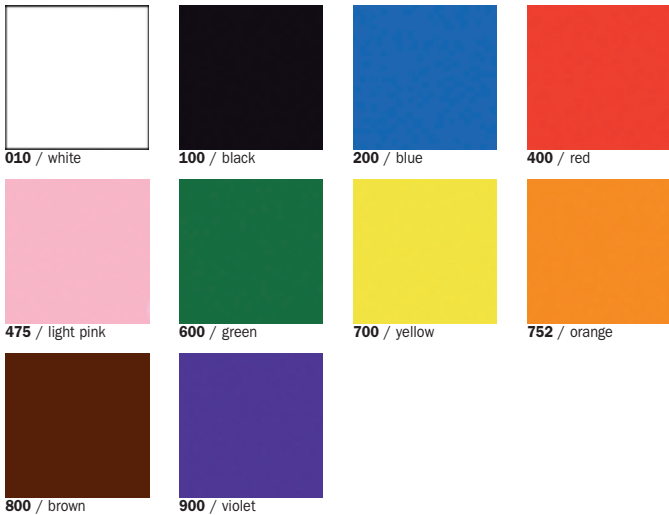

darwi® Kids – Self hardening clay – Very soft

Characteristics:

- Very homogeneous, self hardening
- White
- Minimum drying time is 24 hours per cm
- No shrinkage due to drying
- Adheres to a wide variety of materials, such as wood, glass, polystyrene, ceramics, plastics, ...
- Its flexibility makes the clay ideal for children, as well for rehabilitating injured fingers
- Easy to cut with a knife or scissors

Applications:

- Before modelling, slightly moisten hands and knead the clay well to soften
- Drying: at room temperature on absorbent paper
- Paint or varnish

Darwi Softy

79 269 99 Darwi Softy, 94 x 63 x 79 mm, 6 x 62 g SQ: 3 Set

darwi® Softy – Coloured vegetable modelling paste on wax-basis

Characteristics:

- Coloured plant-based modelling paste, very malleable
- Firm texture, high plasticity
- 9 inter-mixable colours
- Does not stain hands
- Because of its unique composition, SOFTY modelling paste stays soft forever
- Kneading SOFTY modelling paste can help rehabilitate injured fingers

Applications:

- Ready to be used – again and again ...
- Ideal for schools and nurseries
- Because of its great plasticity, it can be shaped very finely, so it's great for animated cartoons

darwi® TEX – Paint for textiles, very wash resistant

Characteristics:

- Water-base textile paint
- Because the opacifying agent cannot be added for felt, the TEX OPAK felt range is designed for use on dark textiles (12 shades)
- Designed to decorate fabrics like cotton, linen, jute, wool, silk, synthetic fibres, ...
- Indelible after it has been set with the iron. Wash resistant up to 60°C
- Clean the equipment with water

Applications:

- All techniques, let your imagination take over
- To fix the images, iron the back of the fabric for 5 minutes (on cotton – without steam)

darwi® Varnish – Specially designed to give a «ceramic» finish

Characteristics:

- Alcohol based protective varnish
- Transparent when dry
- Fast-drying on the surface – slow hardening in depth
- Glossy or satin finish

Applications:

- Application on totally dry objects. A milky haze will appear if the varnish is applied on a damp surface. The varnish will also be more fragile.
- Ready to use, apply with a brush in a thin coat and let dry for 3 hours before applying a second coat. The «ceramic» finish will appear after 3 coats of varnish.
- Clean the brush with the «Darwi Cleaner»

The painting exists in 12 mixable shades. Children will be attracted by the bright colours of this range! You can start from these classic colors to create a multitude of tones and effects.

Once dry, the paint is indelible. You will be very satisfied with the coverage and resistance to light of these paints.

Ideal for children, the painting is guaranteed without harmful substance. It meets the European standards for toys. So you can let your toddlers play in peace!

Rainbow acrylic paint

79 80. .. Rainbow acrylic paint, 500 ml

SQ: 4 pc

How to use the Rainbow School Acrylic?

Prepare your colors and possibly the different mixtures. Apply the paint with a brush, a pad or even a finger with your hand if you want to create impression effects!

Use stencils to create perfect patterns. To tint Darwi or Darwi Kids self-hardening modelling clay, mix your acrylic paint with the clay.

Once your job is done, wash the equipment with water.
